
Sperian's Biosystems MultiPro™ IQ Express Docking Station

The Biosystems MultiPro IQ Express Docking Station is an automatic bump test, calibration station and data download center for the MultiPro confined space gas detector. Just place the detector in the dock the MultiPro IQ Express does the rest. The MultiPro IQ Express identifies the instrument and performs a quick battery test before moving on to a bump test. If the detector fails the bump test, the IQ Express automatically performs a full span calibration of the detector without further intervention from the user. Once the instrument passes the bump test or span calibration, the IQ Express automatically tests the audible, visible and vibrating (if available) alarms before downloading instrument data. Once all the tests are passed, the MultiPro IQ Express Dock will show "Ready" on the display, letting you know that the detector is ready to go.

MultiPro IQ Express Docking Station Features

Automated Tests

- Automatic Instrument Identification
- Automatic Battery Test
- Automatic Alarm Tests (audible, visible, vibrating)
- Automatic Bump Test
- Automatic Calibration (if necessary)
- Automatic Record Keeping
- Automatic Ready / Fault indication

Single or Multiple Docks

- Cascade between 1 and 4 docks

Configuration Options

- Standalone calibration station
- Connected to PC via USB or Ethernet for enhanced control over calibration and data acquisition during testing

E-Mail

- Ethernet capable docks can send e-mail to a specified address when a fault is detected

Efficient and Economical

- Bump test in under 30 seconds
- Calibration in about 1 minute

MultiPro IQ Express Dock Pricing

Part Number	Description	Price
54-49-9000	IQ Express Docking Station with Software, Installation Disks and Manuals.	\$ 830.00
54-49-9000N	IQ Express Docking Station with Ethernet capability	\$ 940.00
